Acting Chief of Base, Pullach

INFO: CUP, BOB

- Operational/SPYING/CART/RELEAS
- Summary of Information on PIR/SPYING Cases

REF: 1. BELM-0345
2. IRAS-7209

orig - CE MASTER LIST

ACTION REQUIRED: See Paragraph 11

1. Since Reference 1 states that there is a "current dearth of RELEAS knowledge of PIR operations," a brief summary of our information on PIR/SPYING cases is in order. An exhaustive study is not possible since we seldom have been in a position to get all the details necessary for such a study. Nevertheless, it is believed that an outline of the essential elements of seven cases (SPYING) has told us about within the past year may be of help to Headquarters and the German Station in evaluating the operations mentioned in Reference. BOB has not been on the distribution of PIR correspondence on these cases although undesignated has discussed this in general terms with [] in Berlin and in Munich.

2. The agents were drawn primarily from amnesty-protest groups and all have a Proletarian German background. They were spotted prior to their release from prison on the understanding that through cooperation with the FBI, they could obtain their freedom. In one case the agent, not then in prison, was apparently forced into cooperation with the FBI on the basis of a phony charge of working for the Americans.

3. All of the agents are of above-average intelligence. Some of them held responsible positions in the proletarian government of Bohemia-Moravia. One, a journalist by profession, was a press officer of the government; one was an organizer of the RELEAS movement and one was RELEAS.

Deputy; one is the son of the former Minister of Propaganda and Culture; one is a translator by profession.

4. Training: All of the agents received some form of training prior to being dispatched to the Federal Republic. In certain instances they were instructed in the theories and practices of Marxism; hostile intelligence organizations (and in at least one case, the agent was told to avoid the Americans since their organizations were already being well covered by the Czechs); reports writing; and the essentials of communication.

5. Communications: Communication between case officer and agent has been chiefly by means of letters using A/V. The agent is generally given one or more cover addresses in Prague. In one case the agent received instructions in Morse code from the OTO by radio. He in turn sends his information to one of these Prague cover addresses.

6. Meeting Places: Meetings between case officers and agents have taken place in East Berlin, Vienna, Salzburg, and in one case in Innsbruck. Hotels, restaurants and bars are the usual sites.

7. MI's: These are listed by case. In certain instances, the targets were assigned before the agent came to the Federal Republic, and after he arrived, some have been cancelled, and some have been added from time to time.

a. Fall ANVALD (HSLA-20115, etc.)

- (1) Locate Helmut SCHMIDT (HSLA-21007) and aid his escape from jail.
- (2) Report on construction work in progress at the Rhein-main airport.

b. Fall AGATE (HSLA-19307, etc.)

- (1) Locate EPSTEIN or CAVATA (name of an OPERATOR supplied).
- (2) Report on specific American military installations (later admitted by the OTO to be a hoax mission).
- (3) Investigate a specific individual who, as a Czech agent, had failed to cooperate with the Czechs.
- (4) Investigate East-German youth activities.
- (5) Observe developments in the Bundeswehr.

(6) (NOTE: report on the agent's debriefing by USAF's Historical Research Division, Wiesbaden, was used as collateral after clearance was granted.)

a. FALL AUSTRIA (AGL-10799)

- (1) Report on all formalities involved in registration procedures.
- (2) Report on the political and economic situation in the Federal Republic.
- (3) Attempt to get a job with IAN SPINDEL or HER WELT and ascertain the extent of American control over these publications.
- (4) Determine the location of American agencies and military units in the Federal Republic, specifically in the Wiesbaden area.

c. FALL ALABAMA (FALL-4032, etc.)

- (1) Recruit the agent's sister who was working in a Calagne factory having defense contracts.
- (2) Investigate Landsmannschaft activities.
- (3) Report on German political attitudes towards the GDR.

a. FALL ALLENBACH (FALL-6197, etc.)

- (1) Penetrate SPWINIG (names of three SPWINIGs supplied, one incorrectly).
- (2) Contact Vladimir POKORSKY, said by the GDR to be either an SPWINIG (he does not) or to have SPWINIG connections.
- (3) Investigate Landsmannschaft activities.
- (4) Contact and report on General PRCHALL.
- (5) Investigate two other named individuals believed by the GDR to be SPWINIGs (not the ones).
- (6) Contact interrogators of the LTV/Wuerttemberg-Baden and try to get recruited as a spy.
- (7) Contact an individual in Munich described as belonging to the GDR.

2. Fall AGENT (2011-1254, etc.)

- (1) Recontact UPWIND (see agent has many acquaintances and contacts who are or were UPWINDers).
- (2) Investigate Leadschenschaft activities.

3. Fall ANTILAN (2011-4403, etc.)

- (1) Investigate Leadschenschaft activities.
- (2) Spot candidates for StB recruitment.
- (3) Report on attitude of degress towards the Bonn government.
- (4) Investigate a specifically-named individual (purpose not known).
- (5) Report on Leadschenschaft developments.

4. We agreed with UPWIND that most of these cases offered a good opportunity of getting wider-angle vision on the StB. Unfortunately, as a result of circumstances over which little or no control could be exercised, most of the cases are now either dead, being dropped, or are on ice. The status of each one is set forth in paragraph 10 below.

5. Even so, the following has been learned about the StB, as that organization has been reflected in the cases under examination: The StB has a source of high-grade agents and actively exploits that source; singleton-type agents are the rule; UPWIND is a primary target; good pay is standard practice (the agents usually receive DM 300-500 a month; and in one case the agent got DM 2,500); test missions are often assigned; a fair amount of effort is apparently spent on ideological motivation of the agents; consistent treatment of the agent is standard.

10. Status of Cases:

a. Fall AGENT: Sporadic contact maintained between agent and case officer (few details known).

b. Fall SOAVE: On ice until agent recovers from tuberculosis.

c. Fall ANTILAN: Contact continues but agent has not obtained a job yet; no new DAI's assigned.

d. Fall ALABAMA: Case is dead as a result of the agent's refusal to continue DA role.

a. Full ALLIANCE: Probably dead, but possibly of interest to SIB (the agent has attempted to blackmail a member of the Directorate). As a result of the agent's confidential notice, the case is now closed to GEOPAL, KAPOK, and LFF/Amsterdam-India.

b. Full ALLIANCE: On ice but probably will be turned over to LFF/Bevria as a result of the agent's forthcoming job as attaché en-voies in the Sovietian Ministry of Labor.

c. Full ALLIANCE: On ice until agent receives from King Library.

11. Like BOB, this case is interested in obtaining as detailed a picture as possible of SIB under operation. We feel we could get considerably more information from SPARKS, and thus make a larger contribution to a SIB-BANK study of the SIB, if we had something of a substantive source to give SPARKS. There is no need to halter the contact. However, it is clear that SPARKS, through its own efforts and because it is a major target of the SIB, is and will continue to be in a position to expand SIBANK's knowledge of the subject. Therefore, the Bureau's, and particularly Headquarters's assistance is requested in providing us with background data as it became available on the SIB.
